Interest Calculation for Shopping Transactions (Retail):

Interest will be charged if the Cardholder pays less than the total of the new bills, or pays after the Due Date. Interest on Purchase Transactions is calculated based on the Posting Date of the transaction made. The interest rates that apply to purchase transactions are listed on the billing statement. Unpaid fees, penalties, or interest are not included into the interest calculation component. Interest will be charged on the next billing statement. For a complete interest calculation can be seen in the credit card interest calculations illustration.

Illustration of interest calculation for spending transactions (retail)

Credit card interest calculation formula = $\frac{\text{Number of transactions} \times \text{day difference} \times (1,75\% \times 12 \text{ months})}{365 \text{ days}}$

Day difference calculation formula = $(\text{Bill print date} - \text{Posting Date}) + 1 \text{ day}$

Interest Calculation for Cash Advance Transactions:

Interest for Cash Advance is charged and calculated from the Cash Advance Date until the full payment date of the Cash Advance transaction. The interest rates that apply to Cash Advance transactions are listed on the Billing Sheet. Unpaid fees, penalties, or interest are not included in the interest calculation component. For a complete interest calculation can be seen in the illustration of the Credit Card Interest Calculation
